B. Reading Comprehension (16 Ms)

Read the following passage carefully then answer the question below:

Twenty years ago, kids in schools had never even heard of the internet. Now, I will bet you cannot find a single person in your school who has not at least heard of it. The 'net' in internet really stands for network. A network is two or more computers connected together so that information can be shared or sent from one computer to **another**. The internet is a **vast** resource for all types of information. You may enjoy using it to do research for a school project, download your favourite songs or communicate with friends and family. Information is accessed through web pages that companies, organizations and individuals create and post. Anyone can put anything on the internet, so you have to be careful and use your judgment and common sense.

Therefore, you have to be sure that whoever posted the information knows what they are talking about, especially if you are doing research! If you are just emailing people, you still have to be very careful. If you have never met the person that you are communicating with online, you could be on dangerous ground! You should never give out any personal information to someone you do not know, not even your name! And just like you can't believe the information on every website out there.

a. Choose the correct answer from a, b, c and d:- (6x 2=12 marks)
