**VI- Reading Comprehension (110 Marks)****Read the following passage carefully, then answer the questions that follow:**

110

The ocean is one of the most fascinating and mysterious places on Earth. Covering about 71% of our planet's surface, it is home to an incredible variety of life forms, many of which remain unknown to science. Learning about the ocean can open the door to an exciting world of discovery and adventure!

One of the most interesting features of the ocean is its depth. The deepest part of the ocean is the Mariana Trench in the Pacific Ocean, which plunges to a great depth of about 11 kilometers. To make it simple, if you placed Mount Everest, the tallest mountain on Earth, into the Mariana Trench, **it** would still be underwater! The extreme pressure and lack of sunlight at such depths make it one of the most challenging environments to explore.

Despite these challenges, scientists have developed advanced submarines and remotely operated vehicles (ROVs) to study the ocean's depths. These expeditions have led to amazing discoveries, such as giant worms, glowing jellyfish, and other strange creatures that seem to come straight out of a science fiction movie. These organisms have **adapted** to survive in the harshest conditions, showcasing the incredible power of life.

In addition to its amazing depths, the ocean plays a vital role in supporting life on Earth. It produces more than 50% of the oxygen we breathe and acts as a giant climate controller by absorbing heat and carbon dioxide. Without the ocean, life as we know it would not exist.

But the ocean is under threat. Pollution, overfishing, and climate change are causing serious damage to marine life. Plastic waste, for example, often ends up in the ocean, harming marine life and disrupting habitats. It's important for all of us to take action to protect the ocean, whether by reducing plastic use, supporting conservation efforts, or simply learning more about marine life.

The ocean remains a vast, secret place and only about 20% of it has been explored so far. Who knows what other wonders are waiting to be discovered? Maybe one day, you could be the scientist who helps unveil its secrets!

**A) From a, b, c and d, choose the correct answer: (5x10= 50 Marks)**

28. The **best title** for this passage would be:
- The Climate of the Ocean
  - How to Save the Ocean
  - The Amazing Ocean**
  - Creatures of the Ocean
29. The underlined word “**adapted**” in the 3<sup>rd</sup> paragraph is closest in meaning to:
- adjusted**
  - placed
  - operated
  - reduced
30. The underlined word “**it**” in the 2<sup>nd</sup> paragraph refers to:
- Mariana Trench
  - Mount Everest**
  - Pacific Ocean
  - great depth
31. According to the passage, the ocean covers:
- 11% of Earth’s surface.
  - 50% of Earth’s surface.
  - 20% of Earth’s surface.
  - 71% of Earth’s surface.**
32. The purpose of the writer in writing this passage is to:
- educate readers about the ocean.**
  - tell readers about the importance of pollution.
  - give us information about giant worms.
  - inform readers about amazing tourist places on Earth.

**B) With reference to the passage, answer the following questions: (4x15=60 Marks)**

33. What can individuals do to protect the ocean?

**People can reduce the use of plastic./ ... support conservation efforts. /... simply learn more about marine life.**

34. Why exploring oceans' depths considered one of the greatest challenges for scientists?

**It's considered a challenge due to extreme pressure. /...lack of sunlight.**

35. What is the name of the deepest part of the ocean?

**Mariana Trench is the Deepest part of the ocean.**

36. Why is the ocean under threat?

**The ocean is under threat because of pollution. /... overfishing. /...climate change.**

**Any reasonable answer related to the passage is to be accepted.**

**VII - Summary Making (60 Marks)****Read the following passage, then do as required:**

Normal fires typically involve materials like wood, paper, or fabric. These fires can be stopped with water or fire extinguishers designed for ordinary fires. However, grease fires are highly different and dangerous. When cooking oils or fats overheat, they start and catch fire. Unlike normal fires, grease fires react strongly to water, spreading the flames instead of stopping them. These fires require special techniques to stop them, such as covering with a metal lid, baking soda, or a special fire extinguisher. Attempting to use water on a grease fire or moving the burning pan can make the situation worse, causing grease fires to be far more hazardous and require specialised precautions, especially in kitchens.

**In a paragraph of FOUR sentences ONLY, summarise and paraphrase the passage above in answer to the following question:**

“What makes grease fires different from normal fires?”

The answer should include the following points:

- Overheating of cooking oils or fats.
- Reacting strongly to water/Spreading the flames.
- Requiring special techniques to stop them.
- Requiring specialised precautions.
