## V1- Reading Comprehension ( 80 Marks )

Winter is cold in some places. Many plants do not grow during winter. Some plants die. Snow and ice may cover the ground. It can be hard for animals to find food during winter. Some animals get through this time in many ways.

Birds and butterflies can fly. Many of them do not stick around for the winter. They leave. They go to a place with nice and warmer weather. Then they come home in the springtime. We call this migration. Migration means the movement from one place to another for different reasons. Migrating is a good way to avoid the cold **which** reaches about -40 in some areas.

Another good way to avoid the cold is to sleep through it. Many animals hide during the winter. Their bodies slow down. They save their energy. They do not eat. They live off of their fat. They do this until food returns. We call this hibernation. Snakes, frogs, and bears hibernate. Some animals store food in their homes. They do not sleep all winter, but they do much less. They live on what they saved in the summer and fall. This is what squirrels, beavers, and raccoons do. Skunks do this too.

Other animals tough it out. They do not leave. They do not hide. They must survive. Sometimes nature helps them out. Some animals grow thicker coats in the winter. Other animals change their colour. For example, the arctic fox is brown in the summer. Its coat turns white in the winter.

Winter may be pretty. It is nice to see snow on the trees. But it is **hazardous** too. People are also at risk and danger. You can get frost bitten or worse. How do you beat the winter? Do you wear a thick coat? Do you stay inside? Or do you live somewhere warm?

### A) From a, b, c and d, choose the correct answer:

1. The best title for this passage could be:

a. Winter: A Time to Migrate

b. Hibernation: Sleeping it off

c. Survive: How Animals Beat the Winter

d. Birds and Butterflies: Nature's Movers and Shakers

4. According to the passage, a thicker coat:

- a. would help an animal hide better.
- b. would protect an animal against attacks.
- c. would help an animal stay warm.
- d. would help an animal migrate.

5. According to the passage, all the following statements are TRUE except:

- a. Some animals survive the winter in many ways.
- b. Some animals grow thicker coats or change their colour like the arctic fox.
- c. Some animals migrate to warmer places in the winter like polar bears.
- d. Some animals store food in their homes and sleep all winter.

## V1- Reading Comprehension ( 80 Marks )

Read the following passage carefully, then answer the questions below:

Before mobile phones and computers, written letters were one of the most basic forms of communication to convey thoughts and ideas, to answer queries and everything else that needs to be expressed. The method of sending letters improved a lot over the years. Around the fourth millennium, cuneiform script was written on stone or clay tablets with a reed. For over 35 centuries, this method of writing and communicating was applied. This has been replaced during the Roman Era with alphabetic writing.

Pigeon post is the use of homing pigeons as messengers. Pigeons have an excellent sense of direction and can easily find their way. After composing the message in little **scraps** of paper, they tied them to the bird's leg. Up to this present time, pigeon posts continue to be useful in the most remote places where electricity and Internet are unavailable. This method was also used in the military and navy to convey news and orders from one post to another. A far older way than homing pigeons was the use of smoke signals.

Nowadays, there are a lot of procedures on how to send a letter or a package to any part of the world. Among the popular options is the postal service like FedEx. Shipping fees vary according to the size, weight, the contents of your letter or package and its destination. We have to take into consideration when you want the package to arrive to its destination: overnight shipping (today at night) or next flight-out shipping (where they ship your package once a flight is available). If not urgent, there is also a one to five days shipping.

If you only need to send a letter faster, the Internet is always available and can provide different options. Email is one of the most common methods. Through an email service, you do not have to write down on a piece of paper, use a stamp or spend money. Emailing is a method of sending a letter virtually and the recipient can immediately receive **it** in a matter of seconds or minutes.

**A. From a, b, c and d, choose the correct answer:**

During difficult times, it's easy to have negative feelings and thoughts, which can make it hard to see the positives. However, practising gratitude can help to improve your feelings. There are plenty of reasons to practise gratitude, including benefits to your overall mental health and well-being. Gratitude and happiness are closely linked. Those searching for a way to be happy might want to consider how being grateful can help. In addition, studies have shown that being grateful can lower rates of stress and depression. Moreover, it can also be used as a tool to increase satisfaction with life. So, what are you grateful for today?

## V1- Reading Comprehension ( 80 Marks )

Read the following passage carefully, then answer the questions below:

If you have been reading fairy stories, you may believe that all wolves are harmful, and evil. They eat children, sheep, and other small animals. They are aggressive and won't stop until they get what they want. There really isn't anything good to say about wolves. Or is there? Are wolves just misunderstood?

Wolves are actually nothing like the characters described in fairy stories. While it is true that their diet consists of deer, rabbits, and other small animals, wolves would never attack a child just for the sake of eating. Wolves have been known to attack people when they threaten them. This happens only rarely. Wolves are usually pretty shy animals. **They** stay within their own land and protect their own pack (group).

Wolves are meat eaters, and they must hunt to get their food. They are strong and fast and have sharp teeth. They use their sense of smell to find prey. Wolves hunt in packs and chase their prey until it gets tired. They usually hunt the weakest, slowest animal in a group. Wolves are not cruel; they are just good hunters.

Some wolves, such as the red wolf, are near **extinction**. Their homes are steadily disappearing as people spread their own homes further into the wilderness. Wolves have also been hunted extensively. Ranchers and farmers pose another threat to wolves. They become angry when wolves come onto their property and eat their chickens and sheep. This is a serious problem, because the farmers lose their animals, and the wolves get shot by the angry farmers. No one wins in this battle.

Wolves are an important part of the balance of nature. They hunt weak animals and help keep down the population of some animals such as deer. In many countries, it is now against the law to hunt wolves. Many zoos and scientists are working hard to protect wolves, because they understand just how important and misunderstood they are.
