Read the following passage carefully, then answer the questions below:

Everything that is alive needs energy. All animals get the energy they need from food. Think about the human body as an amazing machine. It can do all kinds of activities for us. Food is the fuel that helps keep the amazing machine **running**. Plants use sunlight to make their own food. Animals are not able to do that. Some animals eat plants, while others eat other animals as meat. Some animals and people eat both plants and animals.

Since plants make their own food using sunlight, the sun's energy is found in plants. The sun's energy is very strong. **It** loses a lot of its strength by the time it goes into a plant. When we eat plants, we get more of the sun's energy than when we eat animals. That is why it is good to eat fruits and vegetables. When an animal eats a plant, the energy is less strong.
