8. Every week, we do a/an ..... in our science class.

**B. Reading Comprehension (16 Marks)**

**Read the following passage, then answer the questions below:**

The Nobel Prize is one of the most important awards in the world. Alfred Nobel started this award. He was born in Stockholm, Sweden, in 1833. Alfred Nobel was a chemist and inventor. He made two big inventions that made him very rich, but he wasn't a happy man. He never got married or had children, and he was sick most of his life. Alfred Nobel died in 1896. When he died, he left \$9,000,000 for the Nobel Prizes.

The first Nobel Prizes were given on December 10, 1901, five years after Alfred Nobel's death. These prizes are for people who do stunning work in Physics, Chemistry, and Medicine. Albert Einstein is one of the famous winners.

Each Nobel Prize has three parts: a gold medal, a certificate, and a lot of money (around \$1.1 million). Sometimes, the Prize can be given to two or three people who work together. In other times, it is not given to anyone, like the Peace Prize in 1972. Every year, the Nobel Organization in Stockholm chooses who wins the Prize.

**a) Choose the correct answer from a, b, c, and d: (6 x 2 = 12 marks)**

9. The main idea of the 2<sup>nd</sup> paragraph is:

- a. The life of Alfred Nobel
