## READING COMPREHENSION

**Read the following passage carefully, then answer the questions below:**

Everything that is alive needs energy. All animals get the energy they need from food. Think about the human body as an amazing machine. It can do all kinds of activities for us. Food is the fuel that helps keep the amazing machine **running**.

Plants use sunlight to make their own food. Animals are not able to do that. Some animals eat plants, while others eat other animals as meat. Some animals and people eat both plants and animals.

Since plants make their own food using sunlight, the sun's energy is found in plants. The sun's energy is very strong. It loses a lot of its strength by the time **it** goes into a plant. When we eat plants, we get more of the sun's energy than when we eat animals. That's why it is good to eat fruits and vegetables. When an animal eats a plant, the energy is less strong. The animal also uses its energy to find the plant to eat.

Like a car that has to be filled with gasoline, living things have to eat again and again. Instead of gasoline, living things use food as fuel.

**A) From a, b, c and d, choose the correct answer: ( 6X2=12 Marks)**

9. What is the best title for this text?

- |                      |                        |
|----------------------|------------------------|
| a- Cars and Gasoline | c- Energy and Food     |
| b- Animals and Sun   | d- Plants and Sunlight |

10. What is the meaning of the underlined word “**running**” in the **1st** paragraph?

- |            |             |             |            |
|------------|-------------|-------------|------------|
| a- working | b- sleeping | c- catching | d- filling |
|------------|-------------|-------------|------------|

11. The underlined pronoun “**it**” in the **3rd** paragraph refers to:

- |         |        |             |           |
|---------|--------|-------------|-----------|
| a- food | b- sun | c- sunlight | d- energy |
|---------|--------|-------------|-----------|

12. Which of the following sentences is **TRUE**?

- a- Animals use sunlight to make their own food.
- b- Plants use sunlight to make their own food.
- c- Human bodies use sunlight to make their food.
- d- Cars use sunlight to make their own food.

13. Humans get more of the sun's energy:

- |                           |                             |
|---------------------------|-----------------------------|
| a- when they eat plants.  | b- when they sleep more.    |
| c- when they eat animals. | d- when they exercise more. |

14. What is the writer's **purpose** of writing this text?

- a- to tell how machines work.
- b- to compare between plants and animals.
- c- to explain that the sun's energy is very strong.
- d- to show that all living things and machines need energy.

**B) Answer the following questions: ( 2 x 2=4 Marks)**

15. When does the sun's energy lose its strength?

.....

16. How is the human body like a car?

.....

**Read the following passage carefully, then answer the questions below:**

Every day there is less and less space on Earth for trash to be buried. Yet, every day we make more and more trash and waste that have negative effect on the natural environment. What can we do? We can recycle some of our trash. Recycling means that the trash will be made into something new and useful that can be used again and again. Recycling helps the Earth in many ways. It saves space in trash dumps where trash is collected to be burnt. Half of everything that we put into dumps could be recycled instead of throwing it. In fact, most things which are made of paper, metal, aluminum, glass and plastic can be recycled. It also **reduces** pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same is true about glass bottles. This can be done over and over again.

Recycling doesn't take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.

**A) From a, b, c and d choose the right answer: (6×2=12Ms)**

**09- What is the main idea of paragraph (4)?**

- a) What recycling is.
- b) How to save the future.
- c) Why plastic is important.
- d) How to recycle different things.

**Read the following passage carefully then answer the question below:**

Twenty years ago, kids in schools had never even heard of the internet. Now, I will bet you cannot find a single person in your school who has not at least heard of it. The 'net' in internet really stands for network. A network is two or more computers connected together so that information can be shared or sent from one computer to **another**. The internet is a **vast** resource for all types of information. You may enjoy using it to do research for a school project, download your favourite songs or communicate with friends and family. Information is accessed through web pages that companies, organizations and individuals create and post. Anyone can put anything on the internet, so you have to be careful and use your judgment and common sense.

Therefore, you have to be sure that whoever posted the information knows what they are talking about, especially if you are doing research! If you are just emailing people, you still have to be very careful. If you have never met the person that you are communicating with online, you could be on dangerous ground! You should never give out any personal information to someone you do not know, not even your name! And just like you can't believe the information on every website out there.

[almanahj.com/kw](http://almanahj.com/kw)

**a. Choose the correct answer from a, b, c and d:- (6x 2=12 marks)**

**9. The best title for this passage is:**

**a- ahead      b- alongside      c- mainly      d- generally**

**Read the following text carefully then answer the questions below:**

Are you an only child? Are you the oldest, the youngest or somewhere in the middle? Middle children are often good at making everyone happy. Unfortunately, they are not usually rich. Often they are not well-educated and don't have a good job. They get less attention than older children, and less money and time are spent on them. Don't worry about being a middle child though - famous and successful middle children include Bill Gates.

The youngest children are often very creative. They are given lots of attention from their older brothers and sisters. So their games and entertainment are often more creative. Many youngest children have successful careers in journalism and sales. Lots of famous actors and actresses are youngest children.

The most successful children are only children and first-born children. More than half of all Nobel Prize winners are first-born. Also more people studying medicine, law and engineering are first born than middle or youngest. While middle children are easy-going, first borns are ambitious and **aggressive**. **They** are also often more intelligent.

So how can we explain differences? Well, first-born and only children have more attention. For only children, there is more money in a small family, so more money is spent on them. First-borns and only children are spoken to more like an adult and spend more time with adults. As a result, if the family has another child, the oldest becomes like another parent.

**A-Choose the correct answer From a, b, c & d: (6x 2 = 12 Ms.)**

**9. The best title for the passage is .....**

- a) An Unlucky Child

**II -Reading Comprehension ( 16 Marks )**

**-Read the following passage carefully, then answer the questions below:**

Amelia Earhart was one of the world's first and most famous female pilots. She made **daring** flights and broke many flight records. She was the first woman to fly across the Atlantic Ocean by herself in the shortest amount of time. She also flew higher in the sky than any other woman pilot of her time. She did all of this in the 1920s and 1930s - when women were expected to be housewives.

In 1937, Amelia decided to fly around the world. It was a very risky flight that had never been completed by a female pilot. Her flight left California on June 1, 1937. Amelia and her airplane made stops throughout South America, Africa, Asia, and Australia. She was tired and sick during much of the flight, but carried on. At each stop she was greeted by admirers. On July 2, 1937, Amelia left New Guinea. She had to cross the Pacific Ocean to complete the flight. Amelia was supposed to land on tiny Howland Island for fuel. She couldn't find **it** and never made it. U.S. ships searched for her for over a week but could not find her. People assumed she had crashed somewhere in the huge ocean. To this day, no one knows for sure what happened to Amelia Earhart. (219 words)

**A) Choose the correct answer from a, b, c and d : (6 X 2 =12 Marks)**

9. What is the best title for the passage?

- a) Flying Around the World
